Software Projects

PharmaGrades

Sep 2023 – Apr 2024

GitHub Link: <https://github.com/ahmadhmi/pharmacy-assistant.git> 🔗

- Created a web-based application (<https://phmagrades.vercel.app/> 🔗) that provides a grading system for students' lab work, specifically designed for the instructors of the Pharmacy Assistant program at SAIT
- Provided a digital solution for creating, editing, and exporting lab mark sheets as formatted PDF files, as well as organizing by blocks, weeks, and labs
- Mainly responsible for backend development, building REST APIs and operating a database to process data smoothly and securely
- Integrated a schema-less database to develop an easily maintainable and scalable application that can adapt to future changes in the Pharmacy Assistant program

Utilized: JavaScript, TypeScript, Next.js, Node.js, MongoDB, Tailwind CSS, GitHub

Flix Discover

Dec 2023

GitHub Link: <https://github.com/yutakikuchi51/flix-discover.git> 🔗

- Developed a web application (<https://flix-discover.vercel.app/> 🔗) that fetches data from a movie API and allows users to browse different movies

- Implemented features to search movies by genre and name, see descriptions, and navigate to trailers
Utilized: JavaScript, Next.js, Tailwind CSS, GitHub

Skills
